Great Inspiration and Pattern Collection!By GraehoundThis is a great book for those interested in macrame and complementary techniques, chock full of patterns and tips, as well as a lot of pictures of inspirational pieces--definitely geared for an advanced macrame artist or someone who has some weaving and knotting experience!1 of 1 people found the following review helpful. Very happy to have found this!By Daniell KFound a copy of this book at a local library a few years ago, but hadn't been able to find it again since. Detailed instructions with patterns included make creating beautiful jewelry items very easy. It also gives instructions for learning how to create your own patterns to use. I'm really looking forward to getting some of the items in this book made.0 of 0 people found the following review helpful. Fiber Bead JewelryBy PatI would like to attempt this craft soon and this one of Helen Banes work that has some nice patterns for a beginners in fiber bead jewelry. The only reason I rated it a four rather than five star is the packaging was terrible. The book was bent although it was a hard cover. It seemed to be compressed sealed which was to tight which bent the book.

Very original...Banes draws on her lifelong interest in found objects and ethnic ornaments... [There are] photos of many of her...necklaces, with diagrammed patterns...unique approach to jewelry design.Library Journal. The results are spectacular...the necklaces become true works of art, not just macram look-alikes.Booklist.

From Library JournalFor these very original jewelry designs, Banes draws on her lifelong interest in found objects and ethnic ornaments. Her book has photos of many of her bead and fiber necklaces, with diagrammed patterns for the woven fiber parts. This off-loom needle weaving is worked over pins on a foam board in a technique similar to pillow lacemaking. The result is a woven pendant incorporating beads and having a large ethnic ornament as a focal point. This unique approach to jewelry design belongs in art as well as advanced crafts collections.
