Frank G. Zalom : Food, Crop Pests, and the Environment: The Need and Potential for Biologically Intensive Integrated Pest Management before purchasing it in order to gage whether or not it would be worth my time, and all praised Food, Crop Pests, and the Environment: The Need and Potential for Biologically Intensive Integrated Pest

Management:

Book by Frank G. Zalom

About the Author This book presents the combined analyses of industry representatives, growers, environmentalists, scientists, and agency personnel on the potential of IPM. Strong emphasis is given to nonpesticide tactics, including biocontrols, host resistance, and cultural procedures.
