It is pretty vague, such as use a griddle to heat plastic, no other alternatives. On You Tube, you can use hot water or a hair dryer to heat the plastic. I gave it one star because the photography was very nice.2 of 2 people found the following review helpful. Easy to follow instructionsBy CyndyAlthough friendly plastic is not as popular as it used to be, I still think it is fun. I had a ragged

piece of photo copied paper that were my instructions. I am glad I found this book. It has good illustrations and instructions.0 of 0 people found the following review helpful. JewelryBy BaExcellent book. Received safely and fast. Thank you.

It's amazing what you can create with Friendly Plastic! Jewelry, gifts, stationery and more. Colorful, professional results easily achieved with simple equipment.
