For someone who preferred to do all her sewing by machine -- this is quite phenomenal.Helen Dafter's silk ribbon creations are stunning. All her books have beautiful detail, and allow me to follow the steps and create beautiful silk ribbon embroidery on my crazy quilts.0 of 0 people found the following review helpful. not that goodBy headacresBook is mostly crude sketched pictures for instructions and patterns. Only 6 pages of colored pictures showing finisheddesigns. Many books with better

instructions and more of them than this. Would never had bought this if I had been able to see it first. 1 of 1 people found the following review helpful. Ideas to Inspire By N. L. Gibbs As a newcomer to crazy quilting, this book provided enough inspiration to last forever. Although not directly geared to crazy quilting, the drawings and directions are so clear that embroiderers of all levels will benefit. Highly recommend for stitchers of all needle crafts.

Dozens of floral patterns. Projects will delight: brooches, hair clasps, keepsake bags, and landscapes gorgeous enough to frame. 112 pages (8 in color), 50 b/w illus., 8 1/2 x 11.
