**From DK : RHS Plant Finder 1999/2000 (Royal Horticultural Society)** before purchasing it in order to gauge whether or not it would be worth my time, and all praised RHS Plant Finder 1999/2000 (Royal Horticultural Society):

This revised edition lists 70,000 plants from alpines to trees and directs you to nearly 600 different nurseries where these plants are available. Included is a section on nomenclature to guide you through confusing names and synonyms.

It also provides nursery addresses, telephone numbers, opening times, location maps and mail order information.
