Helen Nash, Eamonn Hughes : Waterfalls, Fountains, Pools Streams: Designing Building Water Features in Your Garden before purchasing it in order to gage whether or not it would be worth my time, and all praised Waterfalls, Fountains, Pools Streams: Designing Building Water Features in Your Garden:

0 of 0 people found the following review helpful. Not worth the price. By Aphrael Very little information of value here that cannot be found for free on the internet. Unfortunately, I haven't been able to find ANY worthwhile book on the subject. 0 of 0 people found the following review helpful. OK By Otter A few good ideas on making waterfalls and setting up layouts. Some of the projects are so elaborate if you did install them (cost wise) I doubt you would be the type to get your own hands dirty. Have no complaints, but lets face it Buffy isnt operating a backhoe and laying in water and drainage line..... overall a well done done book with good ideas. 0 of 0 people found the following review helpful. Four Stars By Brian Holmes GOOD BACKGROUND

"Nash and Hughes provide detailed instructions on how to construct waterfalls, fountains, pools, and streams of

various sizes, some of which require a large lot and others only a very small space. There is information on basic installation, pump selection, plumbing, fountain accessories and maintenance, and all materials and tools required. An appendix lists 37 plants suitable for stream gardens, giving their growth habits, flowering times, and hardiness."--

From Booklist
Nash and Hughes provide detailed instructions on how to construct waterfalls, fountains, pools, and streams of various sizes, some of which require a large lot and others only a very small space. There is information on basic installation, pump selection, plumbing, fountain accessories and maintenance, and all materials and tools required. An appendix lists 37 plants suitable for stream gardens, giving their growth habits, flowering times, and hardiness. Some of the larger projects would be rather difficult for average gardeners, and the authors suggest that it would be feasible for them to hire a qualified contractor or landscape architect.
