From Sterling : Wood Magazine: How to Build a Great Home Workshop (Wood Magazine) before purchasing it in order to gage whether or not it would be worth my time, and all praised Wood Magazine: How to Build a Great Home Workshop (Wood Magazine):

1 of 1 people found the following review helpful. HOW TO BUILD A GREAT HOME WORKSHOP by Wood Magazine By Ronald Haynes This gem now resides in my workshop library alongside the rest of my vintage and modern-ish workshop and 'how to' books. I stumbled onto it during a foray at our local library then quickly found and ordered it on . It is REALLY chock-full of virtually EVERYTHING associated with refining and having a successful home workshop. This book contains MUCH more information than typical books that simply show other folk's workshops... This is a reference book of workshop layout, all manner of jigs, shop tables, benches, storage ideas, keeping the air clean, heating and cooling, Electrical, safety and everything in-between. I STILL refer to and read one

of my old high school text books titled "Cabinetmaking and Millwork" from 1970 and THIS "How to Build a Great Home Workshop" book will certainly reside on the same shelf. 2 of 2 people found the following review helpful. Outstanding Reference
By John Anderson I find myself in the same boat as many hobbyist woodworkers . . . at the mercy of space and time constraints. I have taken many of the ideas from this book and found they work well for my situation. The mobile "solutions" are excellent and will allow me to tailor my workspace to serve two masters - me and the "hot rod" minivan. The diagrams and plans are accentuated with excellent photos and make construction of the many ideas and projects that much more enjoyable. I highly recommend this to anyone with beginner to intermediate skill levels. Well worth the money. 0 of 0 people found the following review helpful. Five Stars
By Gary Excellent reference on what to plan for when building a shop.

One type of workshop may not suit every woodworker after all, a turner has different needs than a furniture maker but one guide is just right for telling every woodworker how to set up the perfect shop. Wood Magazine provides ideal standards for work flow, machine space, electric power, lighting, ventilation, dust control, and other factors. More than 250 well-illustrated pages present advice on choosing the right space, checking for adequate electricity, customizing a room, heating systems, security in the shop, noise protection, and eyewear options. Plus, there's coverage of workbenches, from drop-lead to full service; stools, stands, and supports; shop cabinet craftsmanship; special storage needs; and easy racks, holders, and organizers.
